

**PICONG VILLAGE VACCINATION DRIVE " A GREAT SUCCESS
21/09/2021"-**

As part of the initiative to have the community of the rural village also to be counted in support for President Cyril Ramaphosa's call to have above 70% of our population vaccinated, as local traditional leadership, with the support of our churches and structures of young people, we worked with the sub district health office of health, district hospital to have outreach vaccination to the small village of Picong.

It was a also good to see residents of our neighbouring villages of Dikhuting, Grasspan also descending to Pitsong for Covid19 Vaccine ,here at the local Roman Catholic church Hall.

One hundred and thirty (130)people were vaccinated still counting when vaccines run out !! Others were still coming....

Thanks to all role players, especially health Managers for Taung Hospital and Greater Taung sub district, professional nurses notably Sr.Galodikwe of the vaccination team that came tyo Picong and the local clinic Manager Ms Gaoraelwe, as well as Roman Catholic Church Parish council, other church leaders," Would be councillors" or councillor elects for their support.

We therefore encourage more and more young people to come forward for their jab so that sooner than later we should return to our stadium, churches and restaurants.

"Because of you we will overcome Covid19"

Yours in in service Kgosi KK Motlhabane- village Picong
